

CASE STUDY MAINTENANCE

An organisation is only as strong as its people. Harsco Rail's success is founded on its collaborative culture, in which the role of any one employee is just as important as the next. Our outstanding products and services are delivered by outstanding people.

Here at Harsco, we build, operate and maintain every piece of equipment we offer, allowing our customers to remain confident the machinery we supply will stay on the tracks through the life of the equipment.

Our top-quality engineers work day and night to keep a vast fleet of grinders, stoneblowers and more in first-class condition, providing on-site technical assistance to troubleshoot and repair equipment.

These highly skilled and experienced teams understand the essential role they play in delivering an unbeatable service to the rail industry. Our wide range of rail maintenance equipment, including aftermarket parts for product improvements, can increase cost efficiency for our customers by extending the lifespan of their equipment.

And our teams are more than happy to offer advice to rail companies on how to bring costs down or increase efficiency. Our commitment to customer happiness does not stop at equipment delivery.
